50 years of innovation

Having surpassed the milestone that was 50 years of UK innovation, the story of Torin-Sifan continues.

Since our humble beginnings on the banks of the Naugatuck river in Connecticut USA, we have come a long way changing names, continents, owners, merging brands and innovation in the most efficient electric motor technology, the story of Torin-Sifan is both eventful and successful.

Of course some things have not changed. Our pioneering spirit and commitment to creativity and quality remain at the forefront of our thinking. We continue to invest in our local community, British engineering and raising the profile of Torin-Sifan throughout the world.

This commitment has culminated in the opening of our brand new EC Manufacturing & Technology Centre in Swindon UK, allowing the development and launch of several new product ranges. The excitement and anticipation of further growth continues.

Paul Kilburn
Managing Director
Torin-Sifan Ltd.

Torin-Sifan undergoes a quiet revolution...

...with an investment of more than £2m, the EC Manufacturing & Technology Centre has newly extended, dedicated capabilities for the production of a highly efficient, whisper-quiet range of centrifugal motorised impellers and fans.

This strengthens Torin-Sifan's position as a front-runner in the advances of motor and impeller technology. More importantly it allows manufacturers to develop class-leading air movement products and systems, positioning themselves at the forefront of their markets.

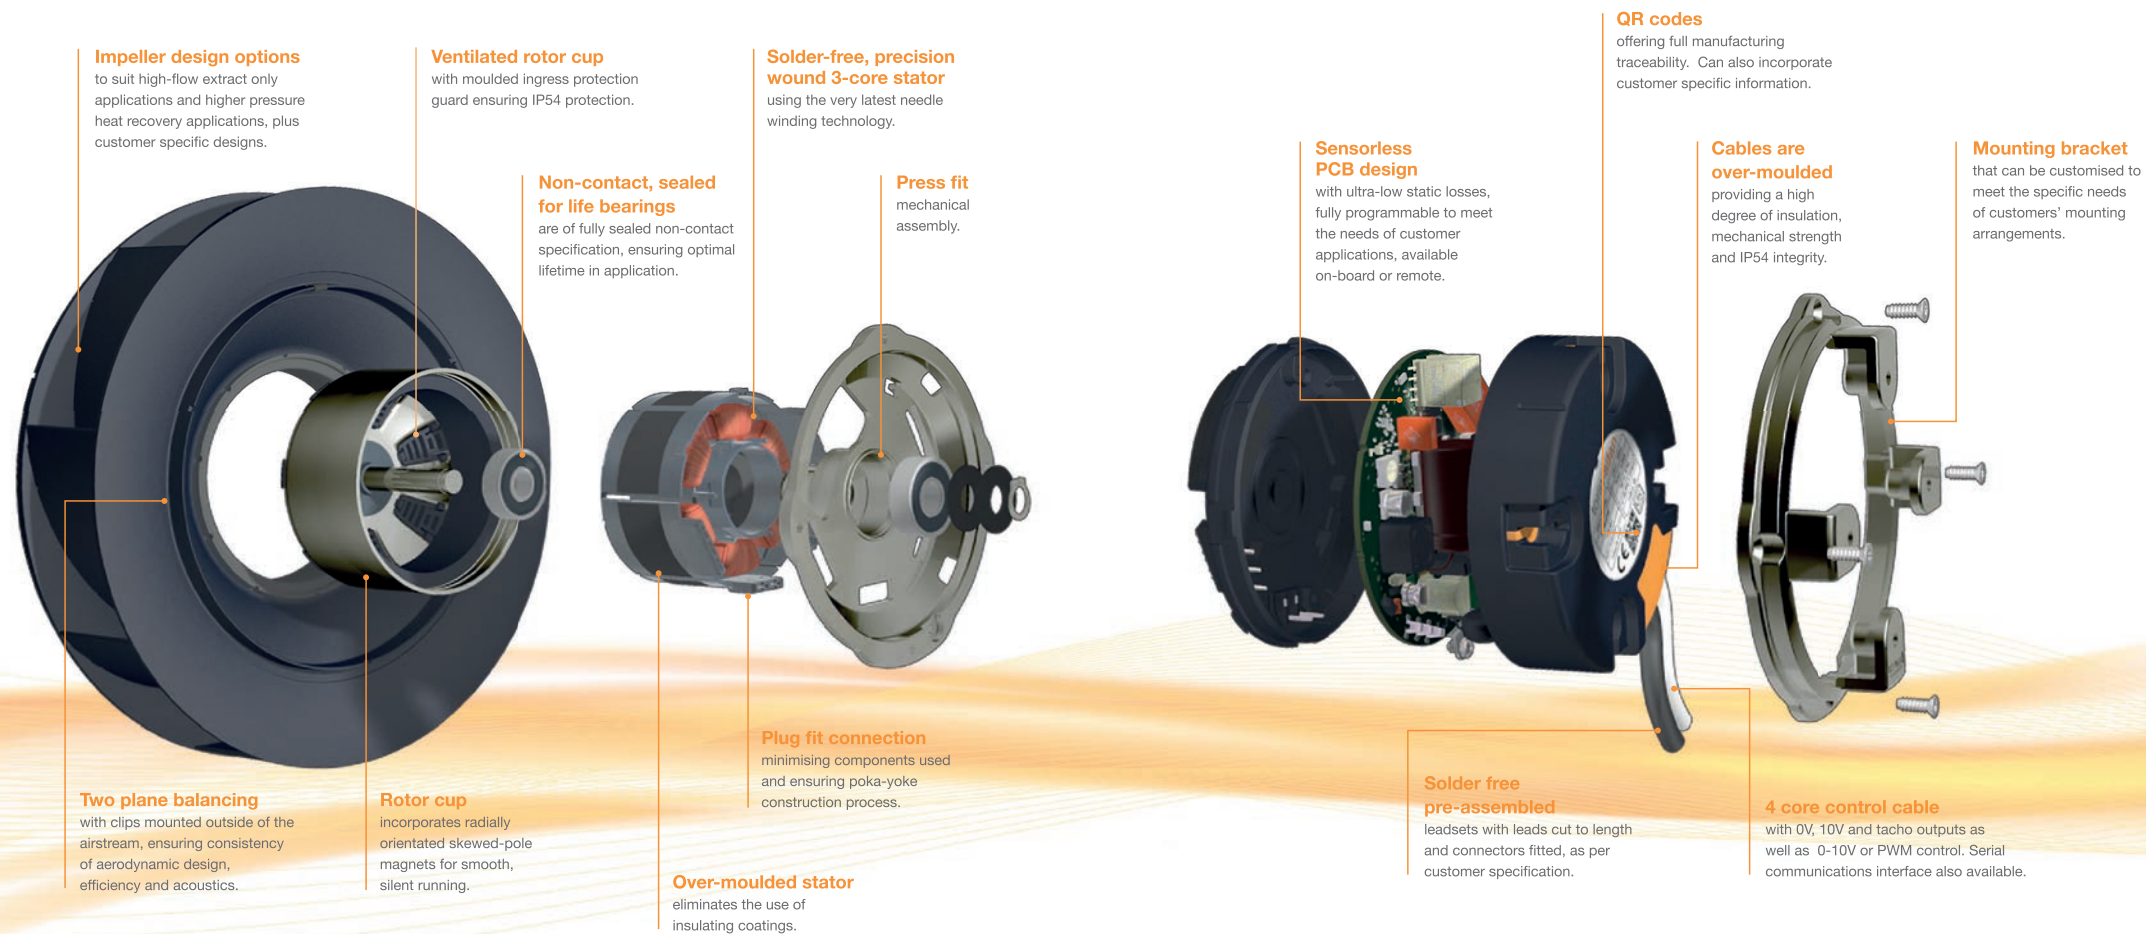

Revolution **360** 

2015

Commitment to R&D is at the very heart of the business at Torin-Sifan. Continuous product development and advancement programmes have resulted in the design of a revolutionary new range of high efficiency motors, motorised impellers and fans.

Innovate360[®]

Torin-Sifan opened its new EC Manufacturing & Technology Centre as well as celebrating their 50th Anniversary in the UK.

2014

Evolution360⁺

The new EC Manufacturing & Technology Centre provides Torin-Sifan with the platform to significantly enhance product range and increase production volume in the continually growing area of energy efficient EC technology fans and motors.

All EC product ranges are now manufactured at the new facility across newly designed production lines. A further three production lines are being designed and implemented to support several new EC product launches, targeted towards applications in the HVAC sector.

Employing 102 people, the facility has been designed in conjunction with its employees and also benefits from the adoption of lean manufacturing techniques optimising the performance of both service and quality.

The original Torin-Sifan Greenbridge site is still in use today and serves as the corporate headquarters...
